

# HEARING CONSERVATION PROGRAM SERVICES

as required by Sask OH&S Noise Control Regulations

- 1) **HEARING SCREENING** using the MAX computerized testing equipment for workers exposed to hazardous noise; interpretation of test results with a qualified occupational health professional and counselling on necessary personal action to prevent noise-induced hearing loss; secure records management; automatic comparison to next periodic tests; copy of test results given to employee; referral for further hearing evaluation and follow-up as indicated.

\* Baseline or Periodic Testing, On-Site or at Clinic: \$25 per person

- 2) **EDUCATION SESSIONS** by qualified occupational health professional in a lively interactive 1.5 hour session including video, demonstration and discussion on the hazards of noise, prevention of noise-induced hearing loss and the proper use and care for hearing protectors; free ear plug samples and take-home literature.

\* \$500 per session or group rate

- 3) **SOUND LEVEL MONITORING** in the workplace: evaluating potential hearing hazards and giving advice on administrative and engineering interventions to reduce hazardous noise exposure.

\* \$150 per hour contract rate

- 4) **CONSULTATION TO EMPLOYERS** in the design and implementation of an effective noise reduction and hearing conservation program using noise regulations as policy guide; management and OHC report with recommendations for interventions and appropriate follow-up.

\* \$150 per hour contract rate
